WAKEFIELD: In a few minutes we shall know the answer to the question that has been occupying the minds of everyone here at Space Control since Mars Probe Seven took off from the Red Planet on its return journey nearly eight months ago. What has happened to astronauts Frank Michaels and Joe Lefee? Communications remained perfect on the long journey out to Mars, and throughout the difficult landing. For a full twelve hours they sent back pictures and reports from the surface Mars both then seemed to be in perfect health. Then silence.

operation, under rather difficult
conditions - the capsules were buffeting
slightly. However, Van Lyden made it.
This must be a moment of tremendous
relief for Controller Cornish and his
team. Van Lyden is now locking on to
Mars Probe 7 after which he will inject
air into the connecting tunnel and
then he will be able to enter the other
capsule and solve the seven month
mystery of the silence of Mars Probe 7

We are all hoping desperately that
the astronauts are alive and well and
have only been prevented from
communicating with us by some
unexplained failure in their equipment.

You will remember that on a recent
moon landing there was a total
communications breakdown, but the
operation was achieved both successfully
and safely. This may well be the case
with Mars Probe Seven.

would melt in the journey through
Earth's atmosphere. That's the
whole point of the recovery capsule.

BRIGADIER: What happened to Mars
Probe Seven's mother ship?

TALTALIEN: There was no mother ship

landing you know. Mars Probe Seven
was boosted off by a three stage
rocket. It jettisoned all stages
and its heat shield to reach Mars.

Int. Warehouse.

COLLINSO and some other
 SOLDIER types in mufti are
 hiding behind some packing
 cases as the BRIGADIER
 and his UNIT SOLDIERS enters.
 COLLINSO waits until the
 UNIT SOLDIERS are well in
 view, then fires a shot
 over their heads. The
 BRIGADIER and UNIT SOLDIERS
 scatter and take cover.

There is an exchange of shots between the two sides. The BRIGADIER is in the thick of it. Some soldiers are shot and one by one COLLINSON'S men are wounded and/or captured.

Finally COLLINSON is outnumbered and outflanked by the UNIT SOLDIERS. It becomes clear during the shooting that COLLINSON is an excellent shot but is shooting to miss. At one point he has a clear shot of a UNIT SOLDIER but shoots the SOLDIER'S gun out of his hand.

COLLINSON'S position has become hopeless and he makes a run for it.

The BRIGADIER leaps forward and stops at the bottom.

BRIGADIER: You can stop right there!

COLLINSON turns and they both face each other with their revolvers trained on each other.

Better put it down.

COLLINSON: You're probably right.

Put COLLINSON doesn't move an inch.

BRIGADIER: You kill me, my men kill you. Pointless really!

TELECINE: 8(Cont.)

A UNIT SOLDIER has hold of a pulley chain with a hook on it. He positions it and draws it back.

COLLINSON: Since you put it like that ...

But COLLINSON still doesn't move.

BRIGADIER: (STILL LOOKING AT COLLINSON) All right - now.

The UNIT SOLDIER lets go of the chain. COLLINSON turns in time to see the chain swinging towards him. COLLINSON staggers to one side, and the BRIGADIER runs up the stairs. He and COLLINSON struggle, and then COLLINSON tumbles down the stairs. The BRIGADIER has lost his gun in the struggle. COLLINSON gets up quickly, the gun still in his hand. He points it at the BRIGADIER'S head. The UNIT SOLDIERS all freeze. Then surprisingly COLLINSON drops his arm, and drops the gun. He rasies his hands. The UNIT SOLDIERS grab him. The BRIGADIER frowns for a second, and then hurries up the stairs, followed by some of his UNIT SOLDIERS.
